

Academy > Learning Paths >

ML PRACTITIONER

Level	All	You'll be able to:
Duration	Approx. 4h	
Target Profile	Advanced Analytics Designer (Data scientists)	

- Create, evaluate, and tune machine learning models with Dataiku's Visual ML tool
- Deploy your models from one job to the next and apply to new data
- Analyze your data with Interactive Statistics
- Take the ML Practitioner certification

11 of 11 completed

RECOMMENDED COURSES TO PREPARE FOR CERTIFICATION

COMPLETE

Machine Learning Basics

Get started with visual machine learning in Dataiku.

22 min

COMPLETE

Scoring Basics

After building ML Models, learn how to deploy production models to the Flow to score new data.

22 min

COMPLETE

Interactive Statistics

Learn how to use tools for visual statistics in Dataiku.

22 min

ADDITIONAL LEARNING

COMPLETE

Intro to Machine Learning

Uncover the mystery of machine learning.

22 min

COMPLETE

Machine Learning 101

Build on your knowledge of Dataiku's visual machine learning capabilities.

22 min

COMPLETE

Responsible AI

Learn how to use features in Dataiku to keep the outputs of AI aligned with Responsible AI principles.

22 min

COMPLETE

Partitioned Models

Learn how to train a model that is only used on partitions of your dataset.

22 min

COMPLETE

NLP - The Visual Way

Learn how to preprocess and model natural language data with about 10 clicks in Dataiku.

22 min

COMPLETE

Image Classification and Object Detection without Code

Learn how to use the Dataiku deep learning capabilities for image classification and object detection.

22 min

COMPLETE

Time Series Analysis & Forecasting

Learn the fundamentals of analyzing and forecasting time series data.

22 min

COMPLETE

Time Series Preparation

Learn how to prepare time series data with the Time Series Preparation widget.

22 min
